To whom it may concern,

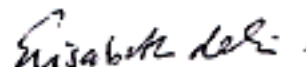

Since early 1997 we use at Daisy Hill Playschool Child Care Centre Ha Ra products. We are very pleased with the results as the tables and benches are free of streaks. Another pleasing point is that around the children we use a chemically free product. There is no more nasty sprays and smells around. This is to a great benefit to children suffering from asthma and other allergic reaction.

I can only advice everybody to use Ha Ra cloths as they are friendly to the environment. There is no water pollution, which is of great importance to us, as water is recycled. Who wants to drink polluted water? This is a very good way to start caring for our environment.

The surfaces cleaned with Ha Ra are free of any residue and that can be felt by just running with the hand over it. The worst part to clean in a household is the exhaust over the stove. Since I am using Ha Ra cloths this is no worry any more and my exhaust is as clean as the bench top in the kitchen.

I recommend Ha Ra products to any one who is concern about the environment, who suffers any allergic reactions and who cares for the future.

Yours faithfully

Elisabeth de Silva
